Converting key fractions to percentages

1. Write the equivalent percentage to each fraction. Round any decimal answers to one decimal place.

$$\frac{1}{2} = \square$$

$$\frac{1}{6} = \square$$

$$\frac{1}{20} = \square$$

$$\frac{1}{3} = \square$$

$$\frac{5}{6} = \square$$

$$\frac{3}{20} = \square$$

$$\frac{2}{3} = \square$$

$$\frac{1}{8} = \square$$

$$\frac{7}{20} = \square$$

$$\frac{1}{4} = \square$$

$$\frac{3}{8} = \square$$

$$\frac{9}{20} = \square$$

$$\frac{3}{4} = \square$$

$$\frac{5}{8} = \square$$

$$\frac{11}{20} = \square$$

$$\frac{1}{5} = \square$$

$$\frac{7}{8} = \square$$

$$\frac{13}{20} = \square$$

$$\frac{2}{5} = \square$$

$$\frac{1}{10} = \square$$

$$\frac{17}{20} = \square$$

$$\frac{3}{5} = \square$$

$$\frac{3}{10} = \square$$

$$\frac{19}{20} = \square$$

$$\frac{4}{5} = \square$$

$$\frac{7}{10} = \square$$

$$\frac{9}{10} = \square$$
