Dividing a 1d.p. number by a whole single digit number

$$2.3 \div 5 =$$

$$\begin{array}{r} 5 \overline{) 2.3} \end{array}$$

$$1.7 \div 2 =$$

$$\begin{array}{r} 2 \overline{) 1.7} \end{array}$$

$$8.5 \div 5 =$$

$$\begin{array}{r} 5 \overline{) 8.5} \end{array}$$

$$6.7 \div 4 =$$

$$\begin{array}{r} 4 \overline{) 6.7} \end{array}$$

$$2.7 \div 5 =$$

$$\begin{array}{r} 5 \overline{) 2.7} \end{array}$$

$$9.4 \div 2 =$$

$$\begin{array}{r} 2 \overline{) 9.4} \end{array}$$

$$5.2 \div 2 =$$

$$\begin{array}{r} 2 \overline{) 5.2} \end{array}$$

$$9.7 \div 4 =$$

$$\begin{array}{r} 4 \overline{) 9.7} \end{array}$$

$$4.5 \div 5 =$$

$$\begin{array}{r} 5 \overline{) 4.5} \end{array}$$

$$5.3 \div 4 =$$

$$\begin{array}{r} 4 \overline{) 5.3} \end{array}$$

$$2.4 \div 2 =$$

$$\begin{array}{r} 2 \overline{) 2.4} \end{array}$$

$$3.6 \div 5 =$$

$$\begin{array}{r} 5 \overline{) 3.6} \end{array}$$
