

Acute and obtuse angles

Identify acute and obtuse angles

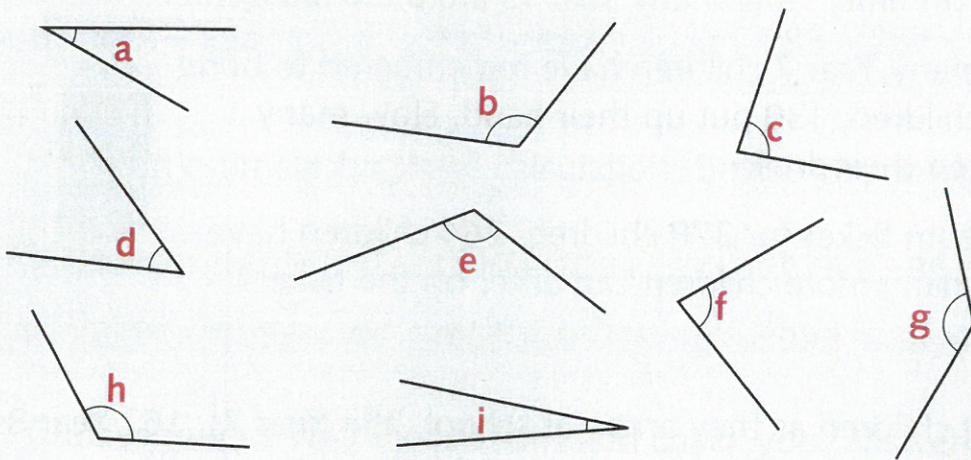

You will need:

- right-angle tester

ges

1 Use your right-angle tester to find the acute and obtuse angles.

Hint

An acute angle is less than a right angle. An obtuse angle is greater than a right angle.

2 Copy and complete the table.

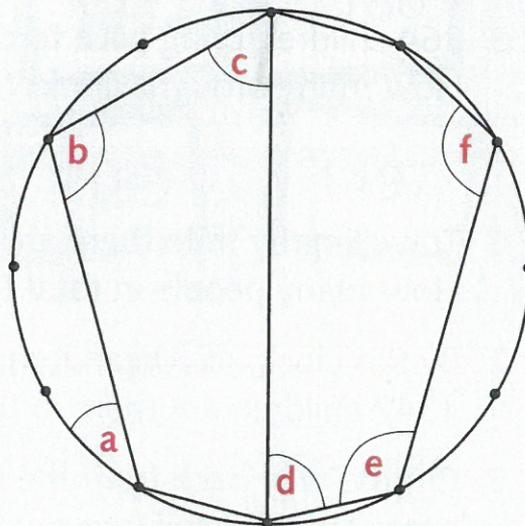

Acute angle	Obtuse angle
a,	

ge

1 List the acute and obtuse angles in the circle.

2 a Using Resource 32: 12-dot circles, investigate drawing a continuous line in a 12-dot circle which makes at least two acute and two obtuse angles.

b Colour the acute angles red and the obtuse angles blue.

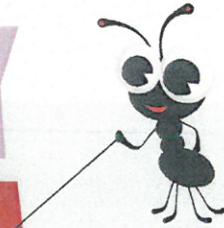

You will need:

- Resource 32: 12-dot circles
- red and blue pencils

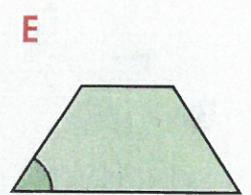

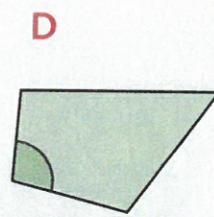

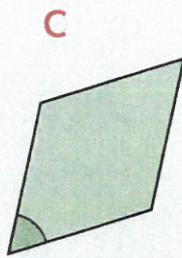

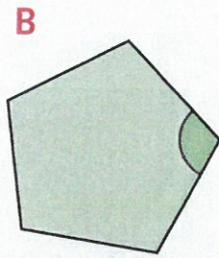

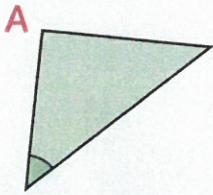

Acute and obtuse angles in 2-D shapes

Identify acute and obtuse angles in 2-D shapes

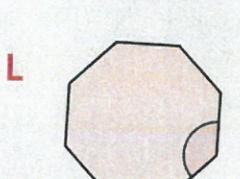

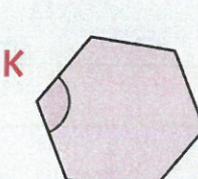

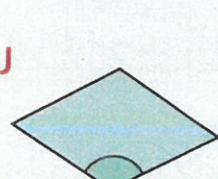

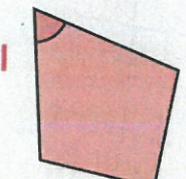

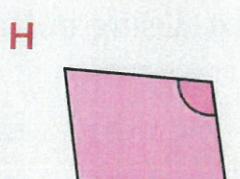

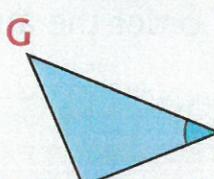

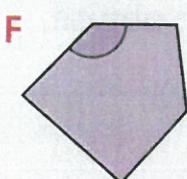

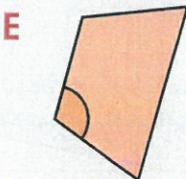

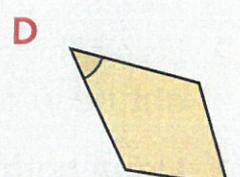

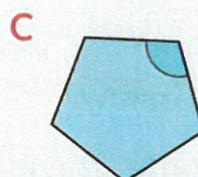

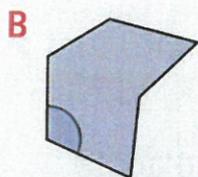

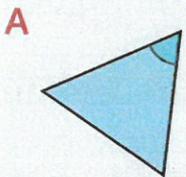

challenge 1

Name the marked angle in each shape as acute or obtuse.

challenge 2

Name the marked angle in each shape as acute or obtuse.

challenge 3

Write the letters of the shapes in Challenge 2 that have:

- a at least two acute angles
- b at least two obtuse angles
- c two pairs of acute angles and two pairs of obtuse angles

Ordering angles by size

Compare and order angles up to two right angles by size

Challenge

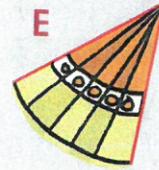

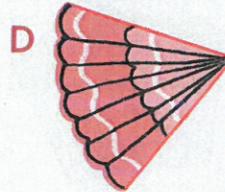

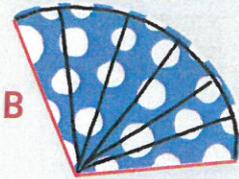

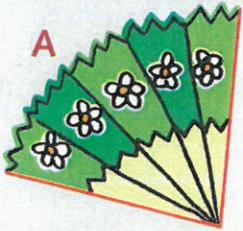

Use your right-angle tester. Write which fans show:

You will need:

- right-angle tester

a an acute angle

b an obtuse angle

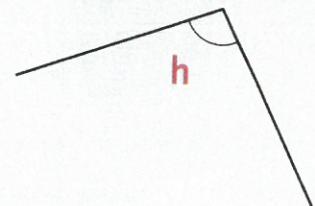

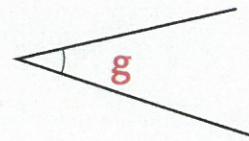

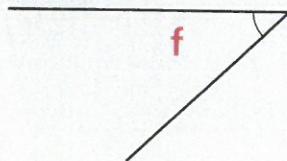

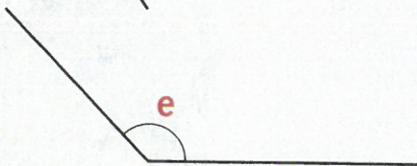

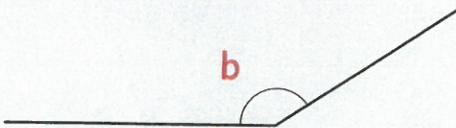

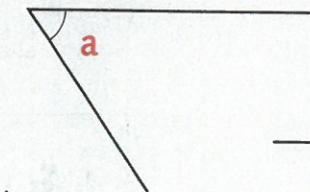

Challenge

- Using the right-angle tester, write all the angles that are acute in the angles below.
- Using the right-angle tester, write all the angles that are obtuse in the angles below.
- Using both testers, order the angles that are acute.
- Using both testers, order the angles that are obtuse.

You will need:

- right-angle tester
- half right-angle tester

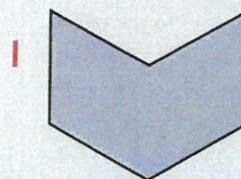

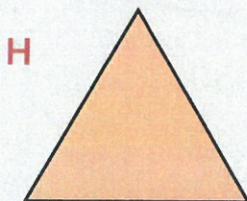

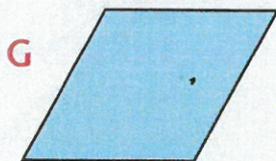

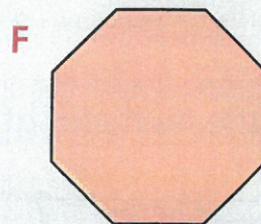

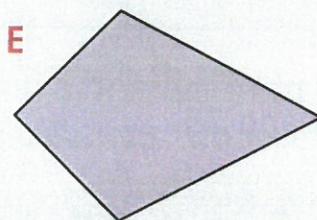

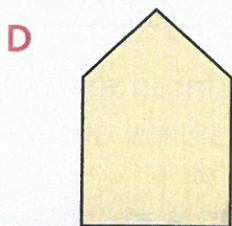

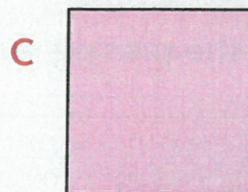

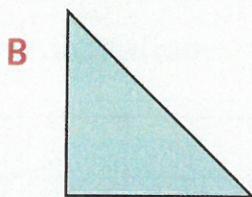

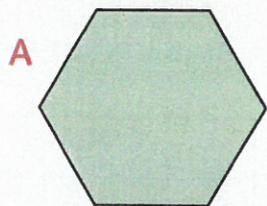

Challenge

Write the letter of the angle in Challenge 2 which is:

- | | |
|------------------------------------|--|
| a about half a right angle | b about half a right angle plus a right angle |
| c the smallest obtuse angle | d the greatest acute angle |

Regular polygons

Decide if a polygon is regular or irregular by comparing lengths and angles

Challenges
1,2

1 Use your ruler to measure the sides of each 2-D shape. Write the letters of the shapes which have:

- a** all sides equal **b** all angles equal

You will need:
• ruler

2 Copy and complete the table for shapes A to I.

Regular	Irregular
A,	

Challenge
3

Look for lines of symmetry in shapes A to I and complete the table.

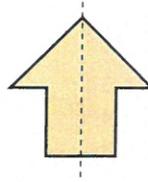

Property	Regular	Irregular
One line of symmetry	A,	
More than one line of symmetry		

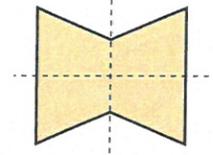

TARGET To identify lines of symmetry in 2-D shapes.

A shape is symmetrical if half of its shape matches the other half exactly. The line separating the two halves is the line of symmetry or mirror line.

Examples
One line of symmetry

Two lines of symmetry

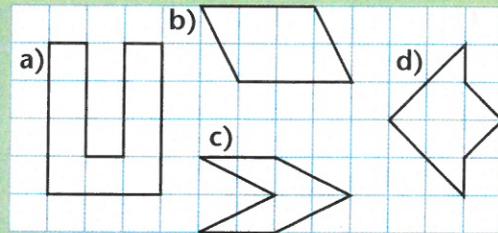

A

1 Which of these letters are not symmetrical?

R C T H P W
B Z M E F Y

2 Copy the symmetrical letters and draw on the line of symmetry.

3 Which of these shapes is not symmetrical?

4 Copy the symmetrical shapes and draw on the line of symmetry.

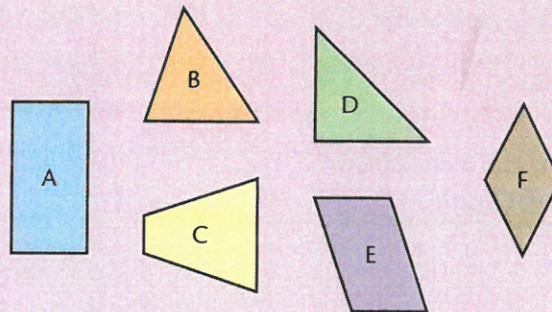

B

1 Which of these shapes have:

- a) one line of symmetry
- b) no line of symmetry?

2 Which of these shapes has:

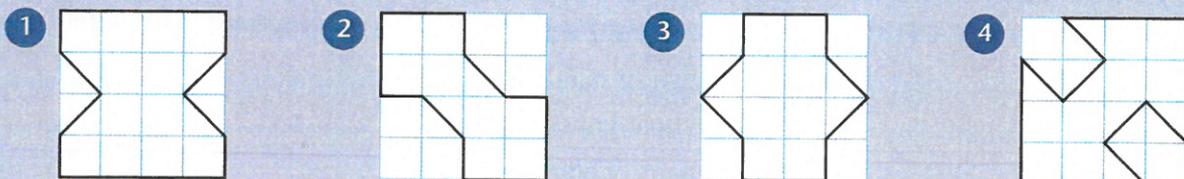

- a) two lines of symmetry
- b) four lines of symmetry?

3 Use squared paper. Copy the symmetrical shapes. Draw on the line(s) of symmetry.

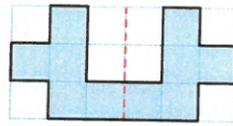

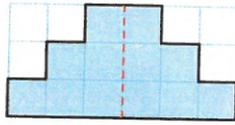

C

Use squared paper. Copy the shapes. Draw both lines of symmetry.

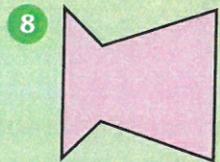

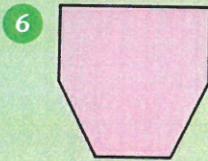

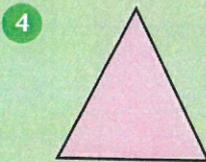

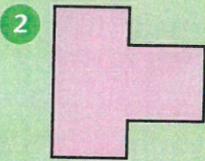

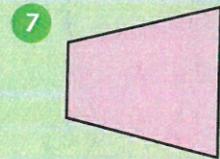

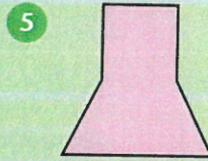

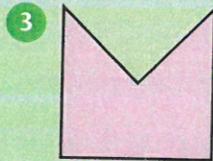

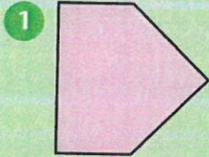

TARGET To complete a symmetric figure with respect to a line of symmetry.

Examples

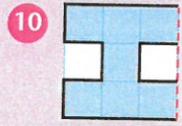

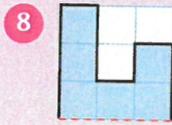

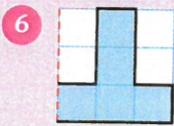

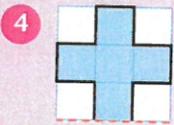

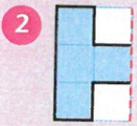

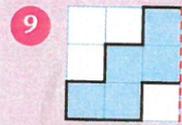

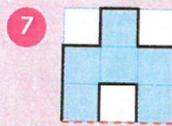

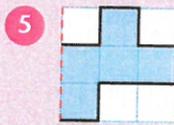

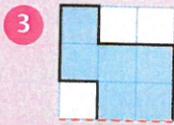

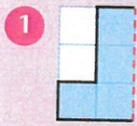

A

Copy the shapes. Draw on one line of symmetry.

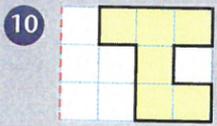

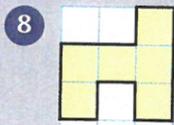

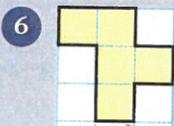

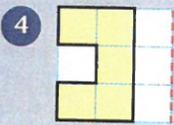

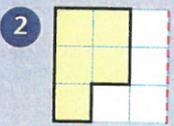

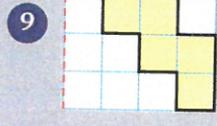

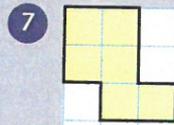

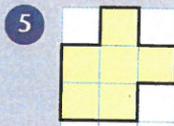

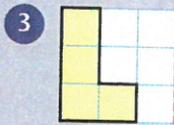

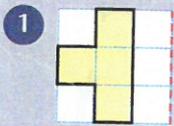

B

Used squared paper. Copy the shape and the mirror line and draw the reflection.

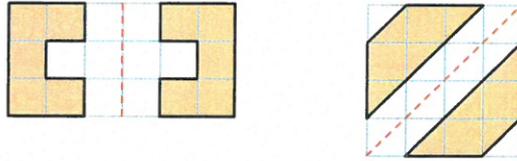

C

Used squared paper. Copy the shape and the mirror line and draw the reflection.

TARGET To complete symmetric patterns involving different orientations of lines of symmetry.

Examples

Used squared paper. Copy the shape and the mirror line. Sketch the reflection.

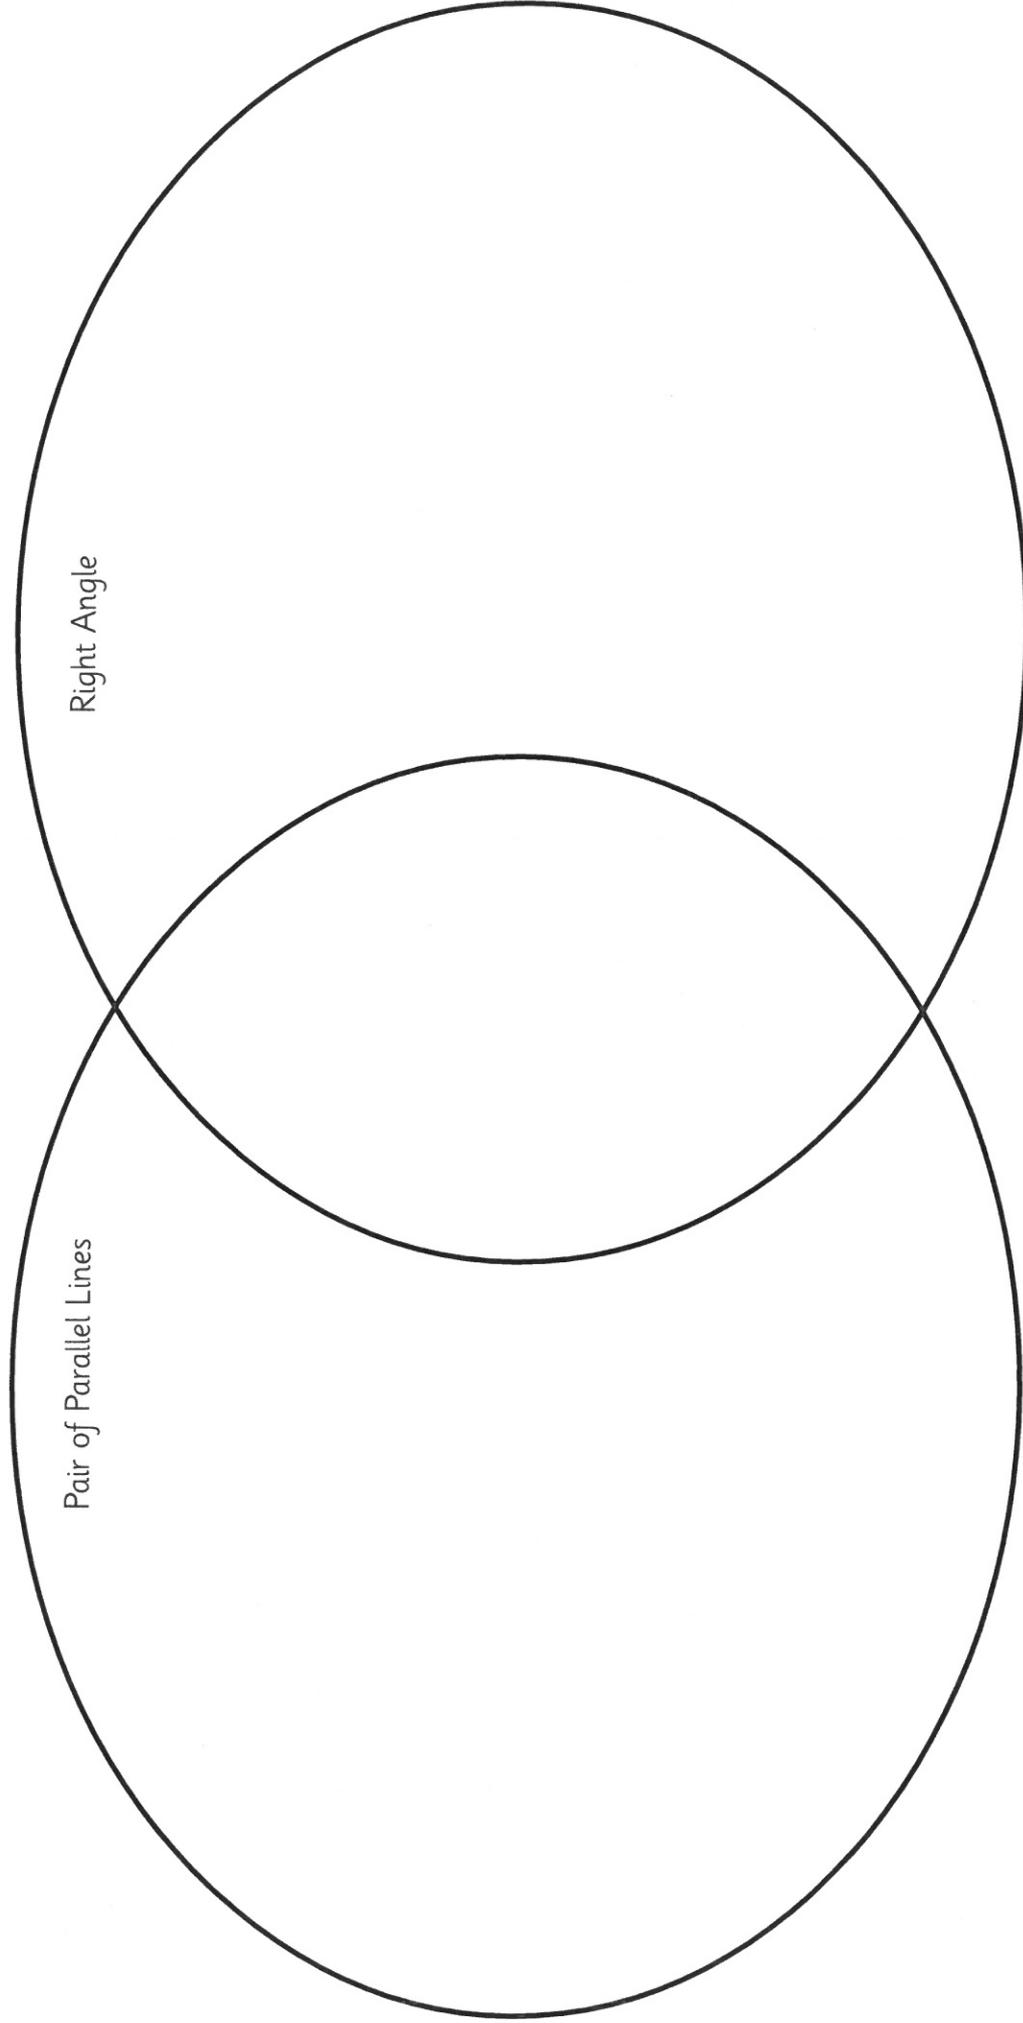

A

B

C

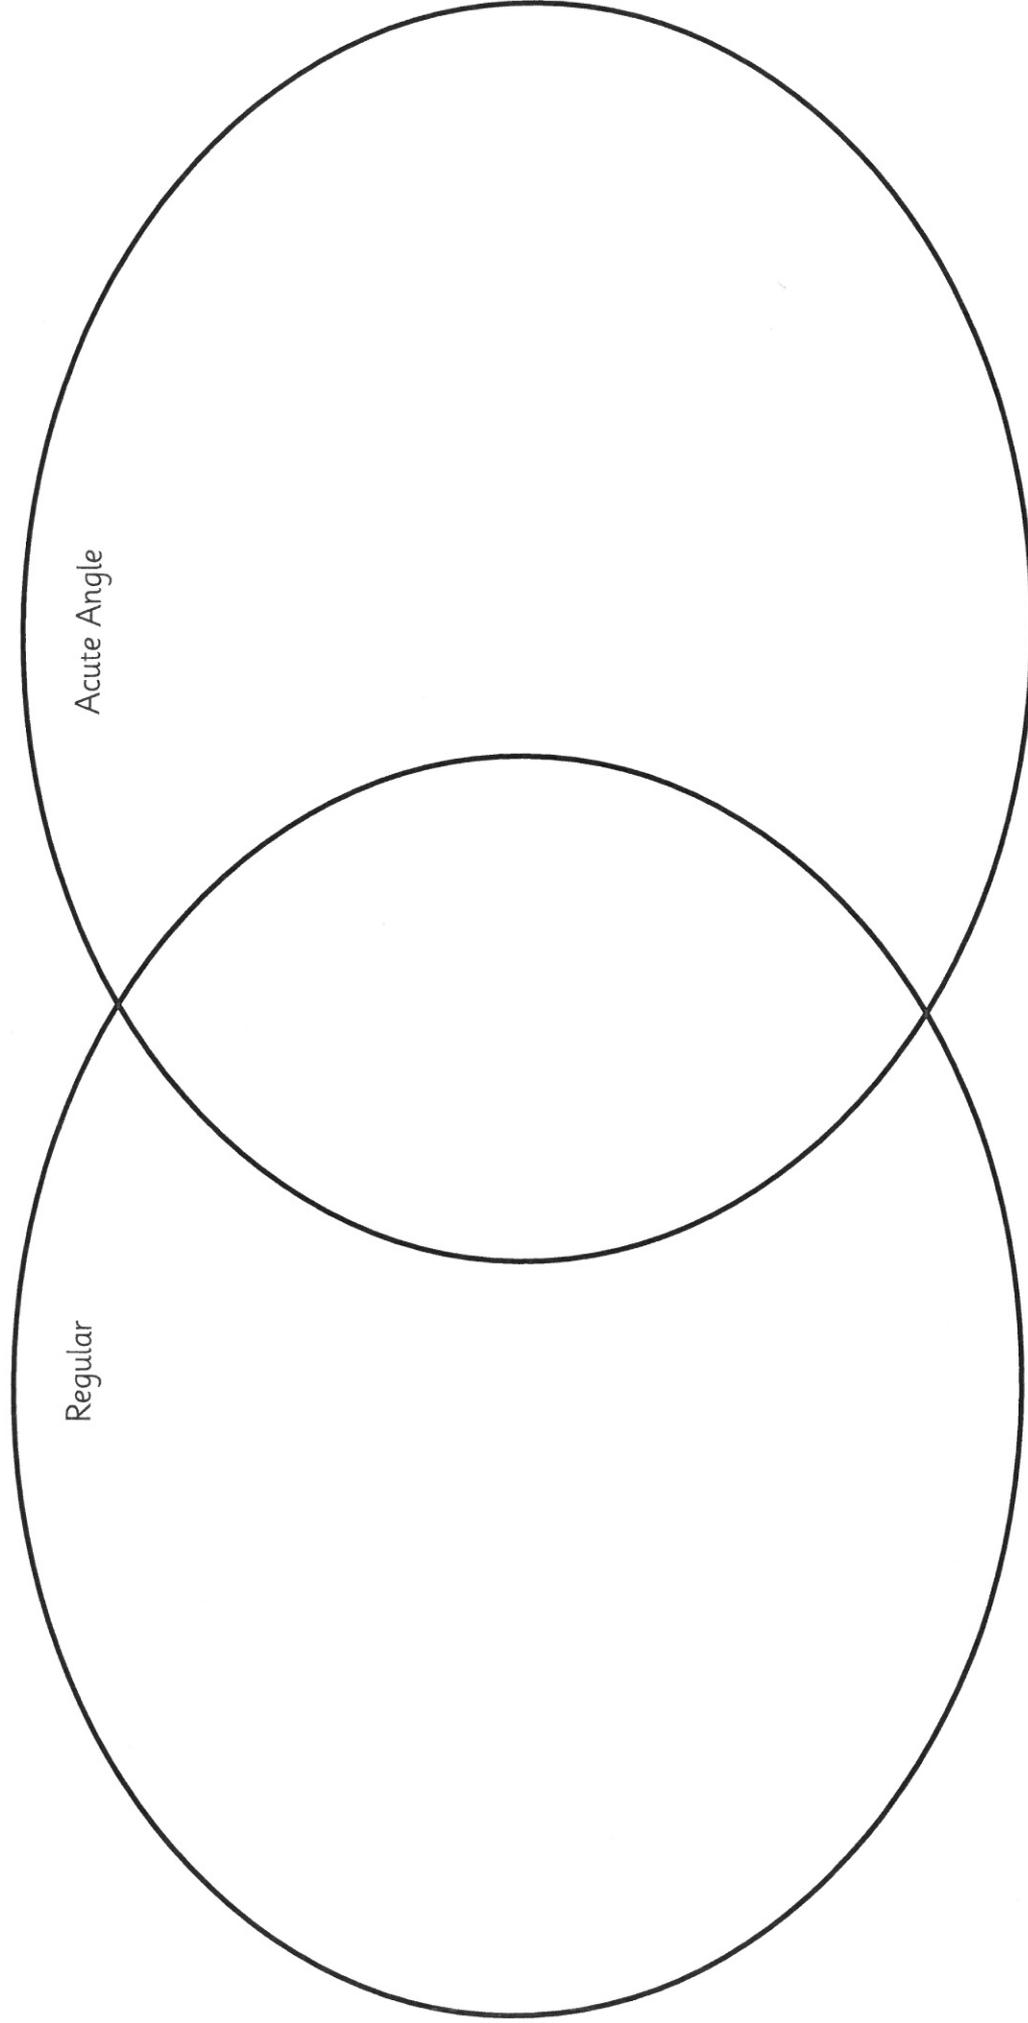

Shape Sort

Sort the shapes into the correct place on the Venn diagram.

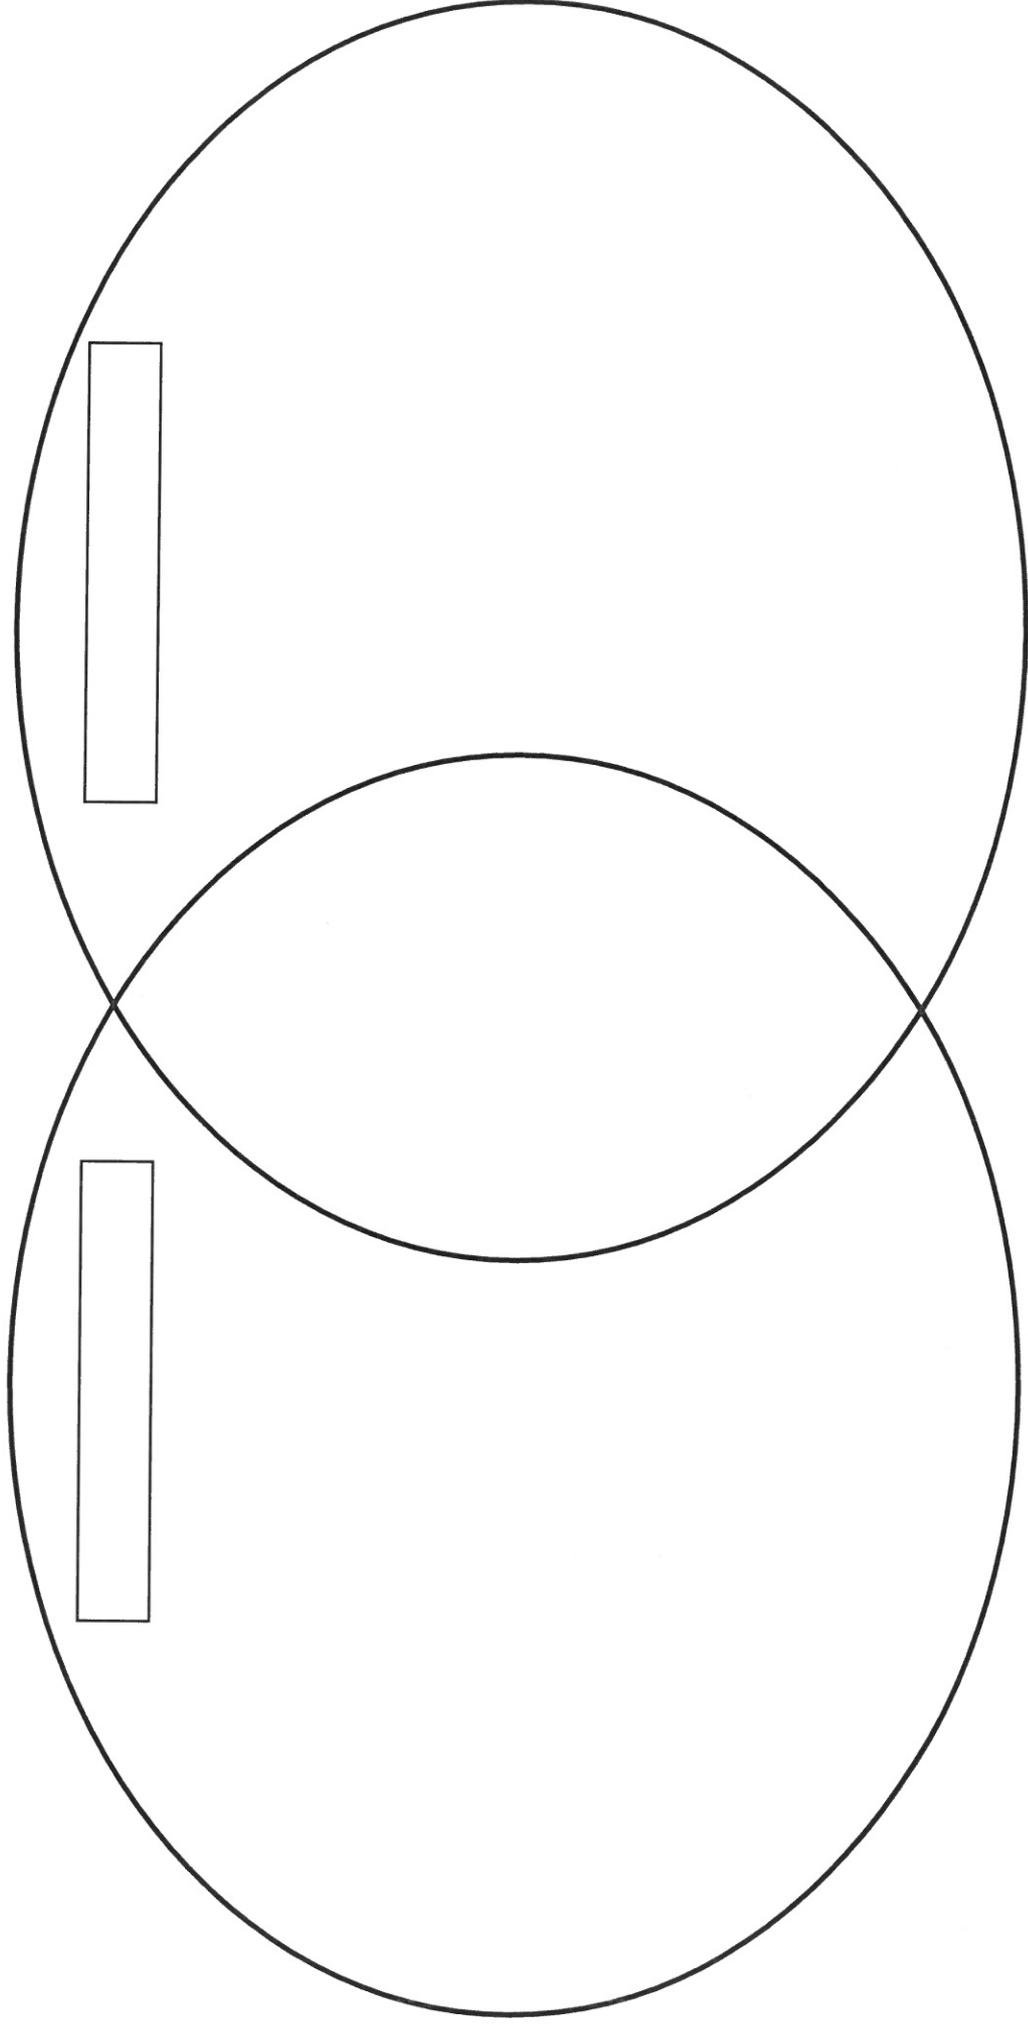

Shape Sort

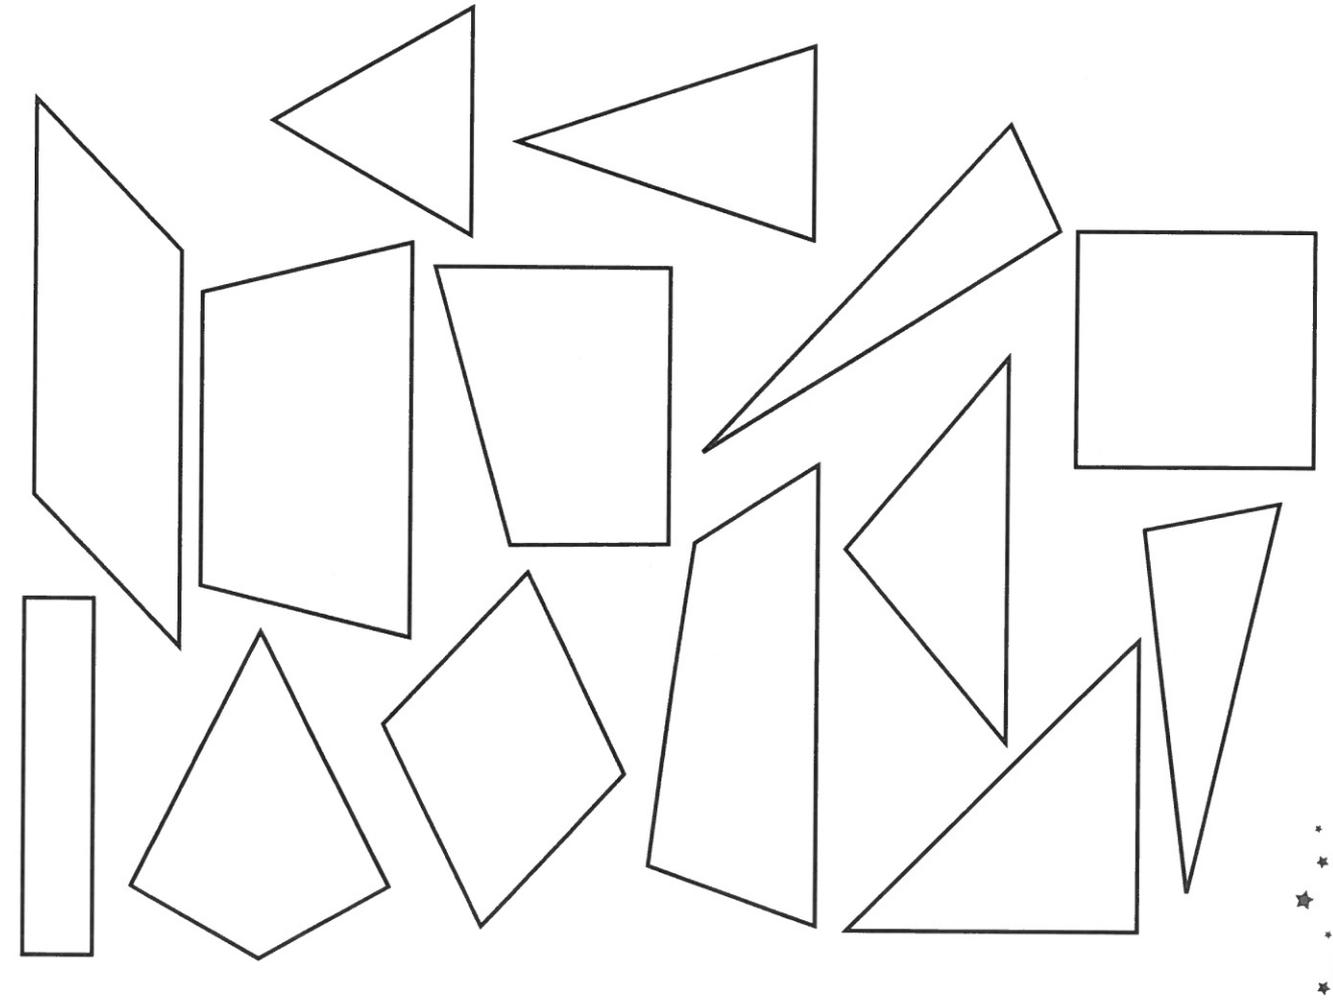

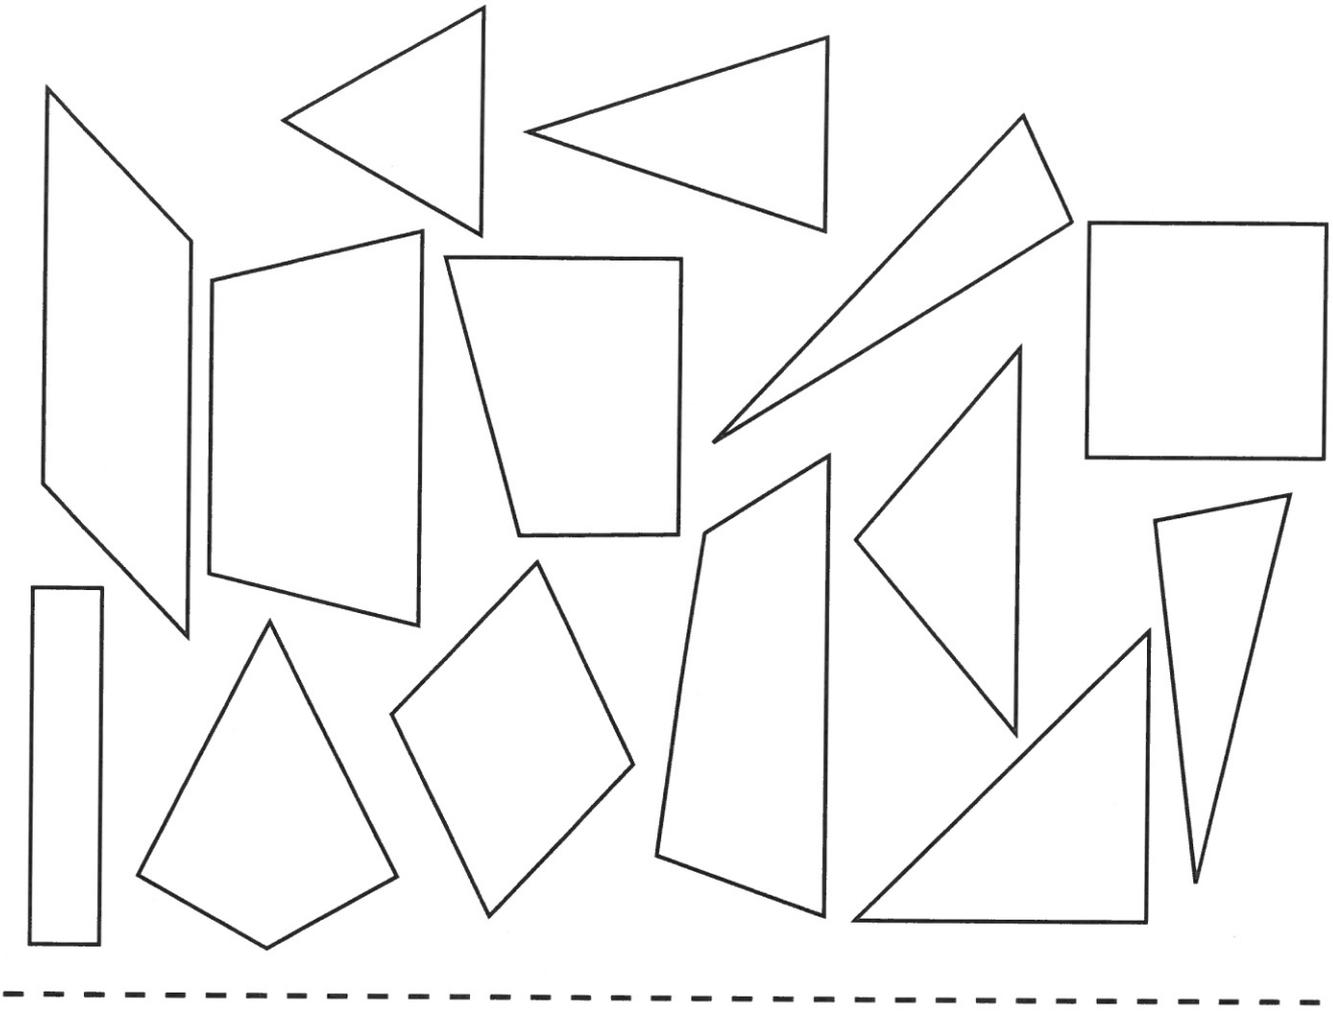

Sort the shapes into the correct place on the Venn diagram.

Shape Sort

Sort the shapes into the correct place on the Venn diagram.

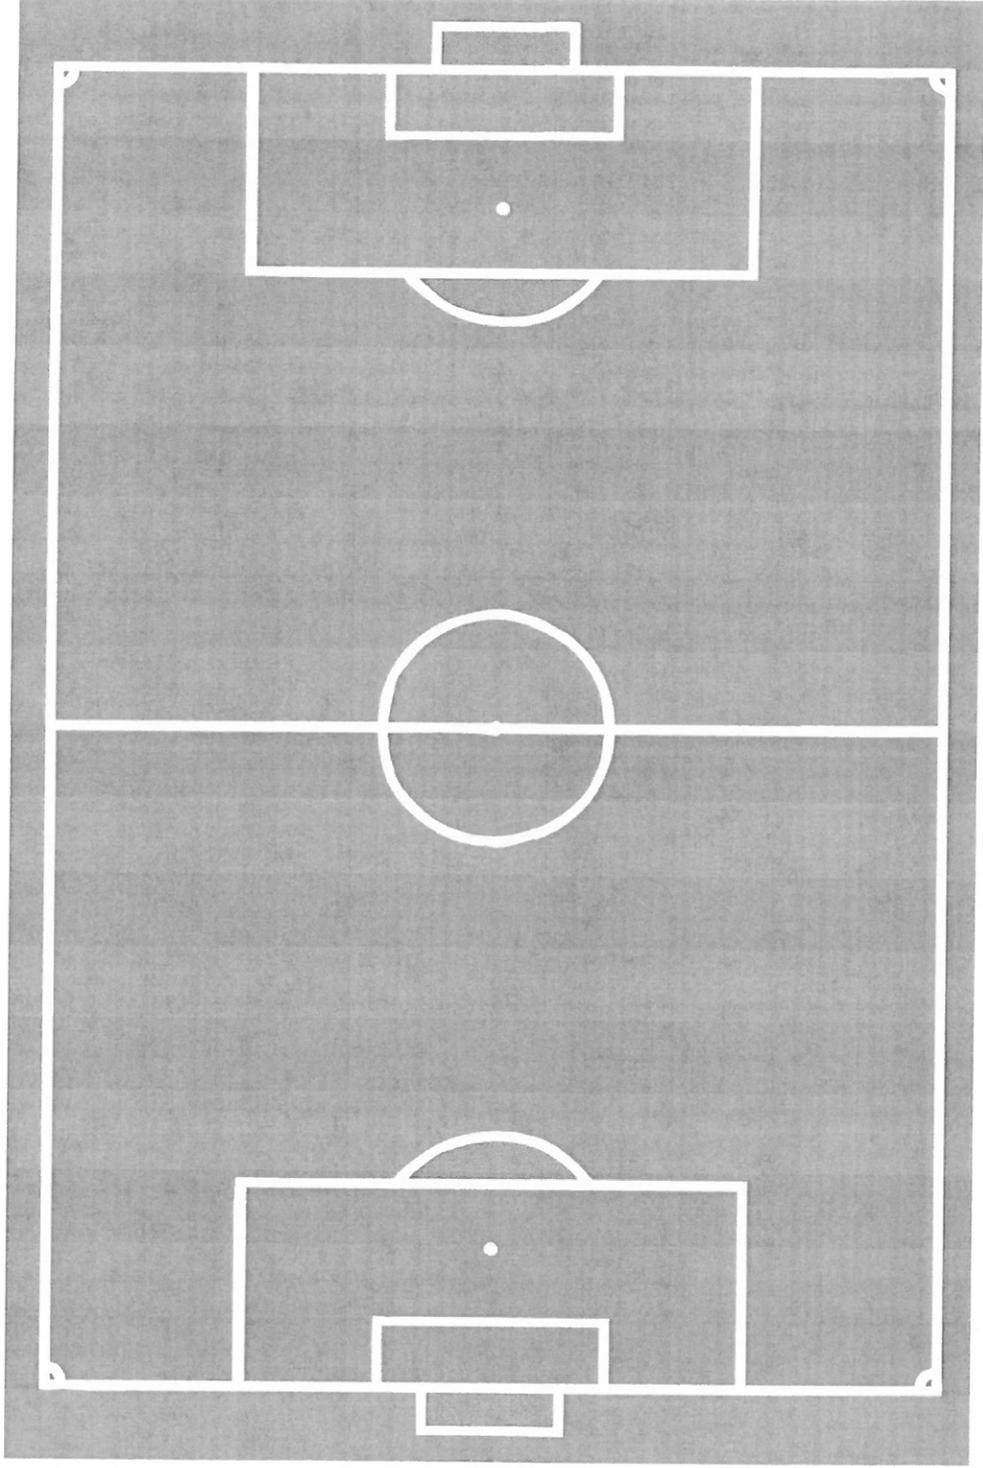

Football Angles

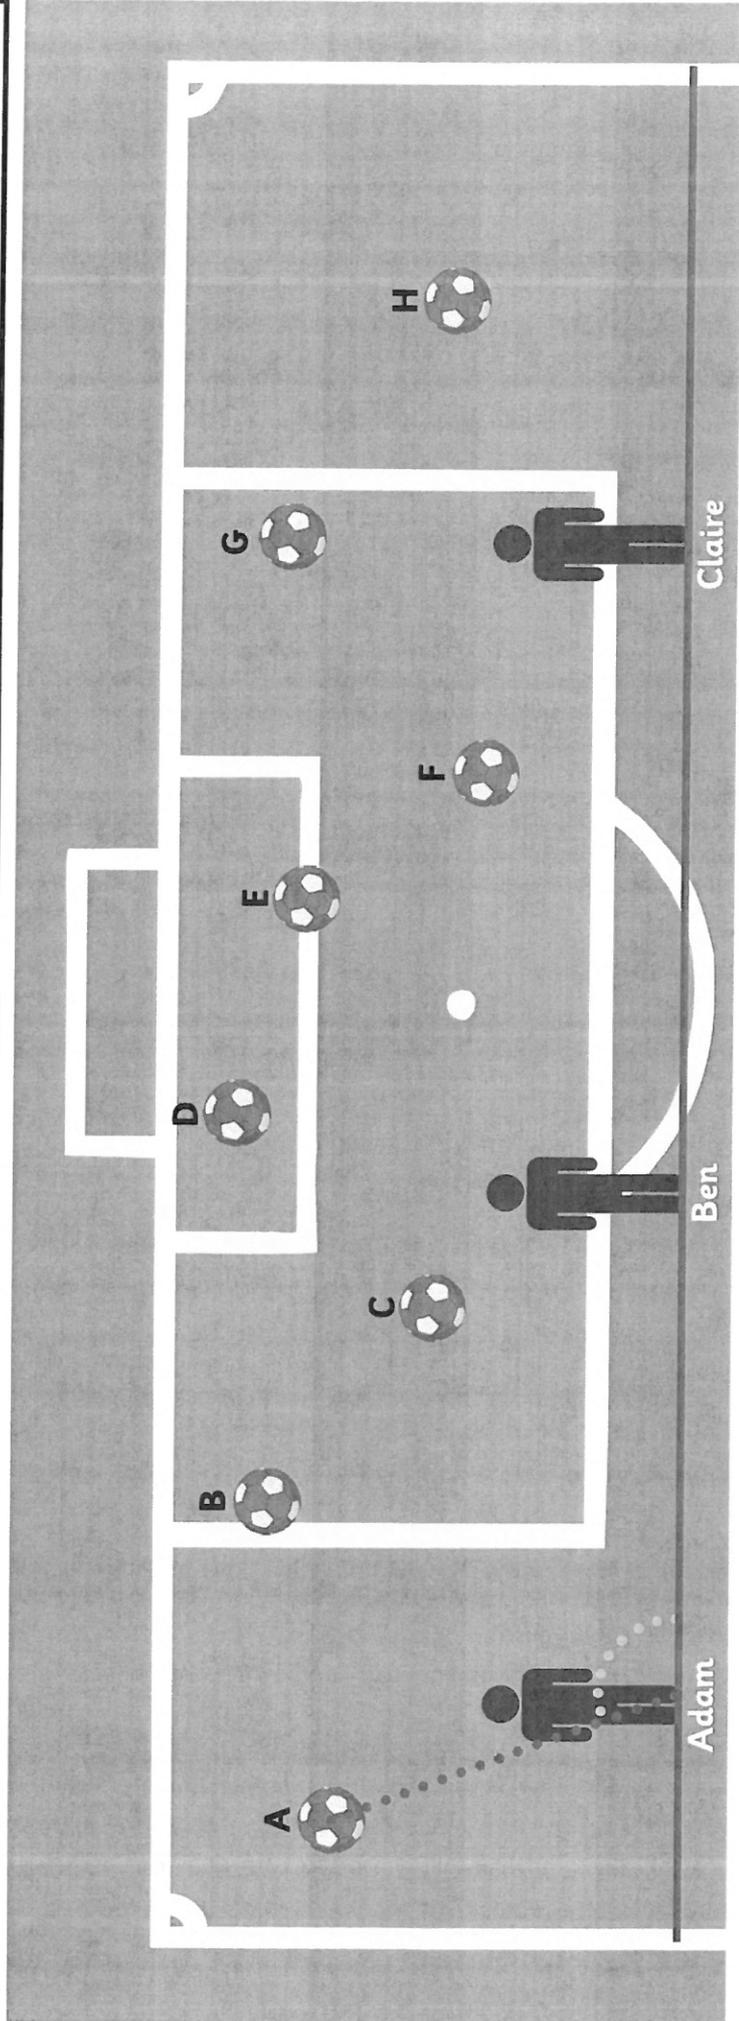

Label the right angles you can see on a football pitch.

Football Angles

Complete the table describing the angle of the kicks.

	Adam	Ben	Claire
Kick A		Kick C	Kick F
Kick B		Kick E	Kick G
Kick D		Kick H	Kick H

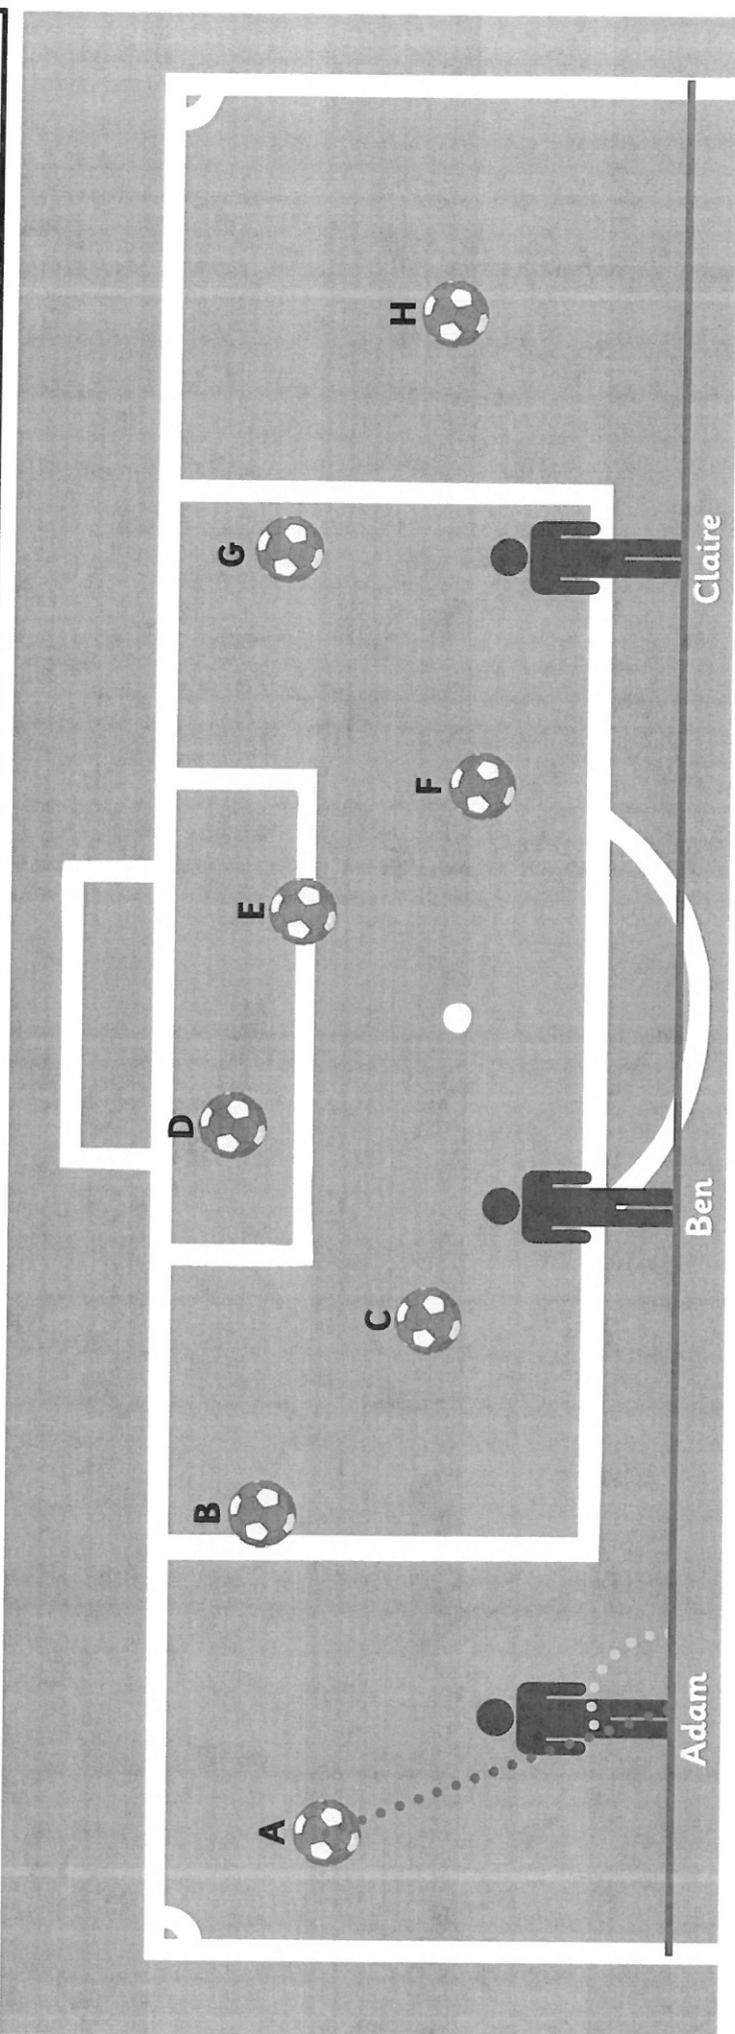

Football Angles

Complete the table describing and ordering the angle of the kicks. (1 being the smallest and 9 being the largest).

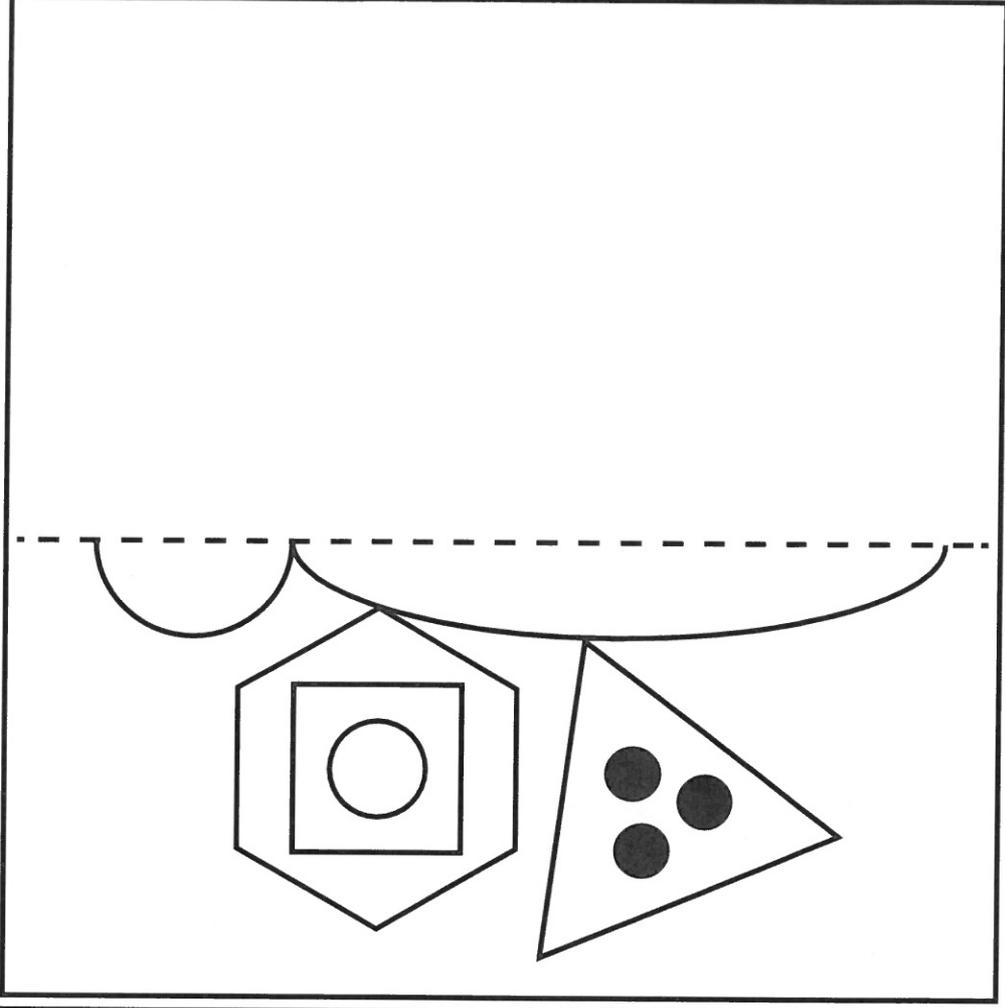

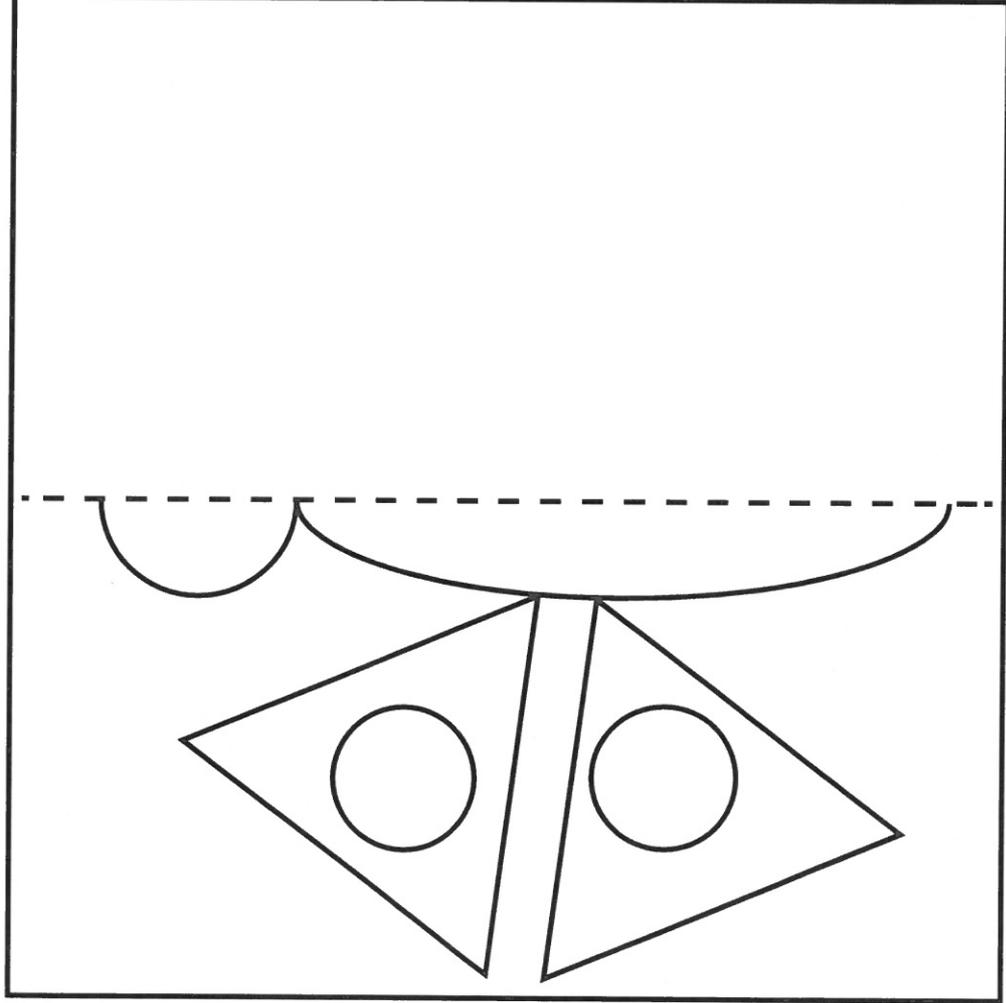

Adam		Ben			Claire		
Kick A	<i>obtuse</i>		Kick C			Kick F	
Kick B			Kick E			Kick G	
Kick D			Kick H			Kick H	

Symmetrical Butterflies

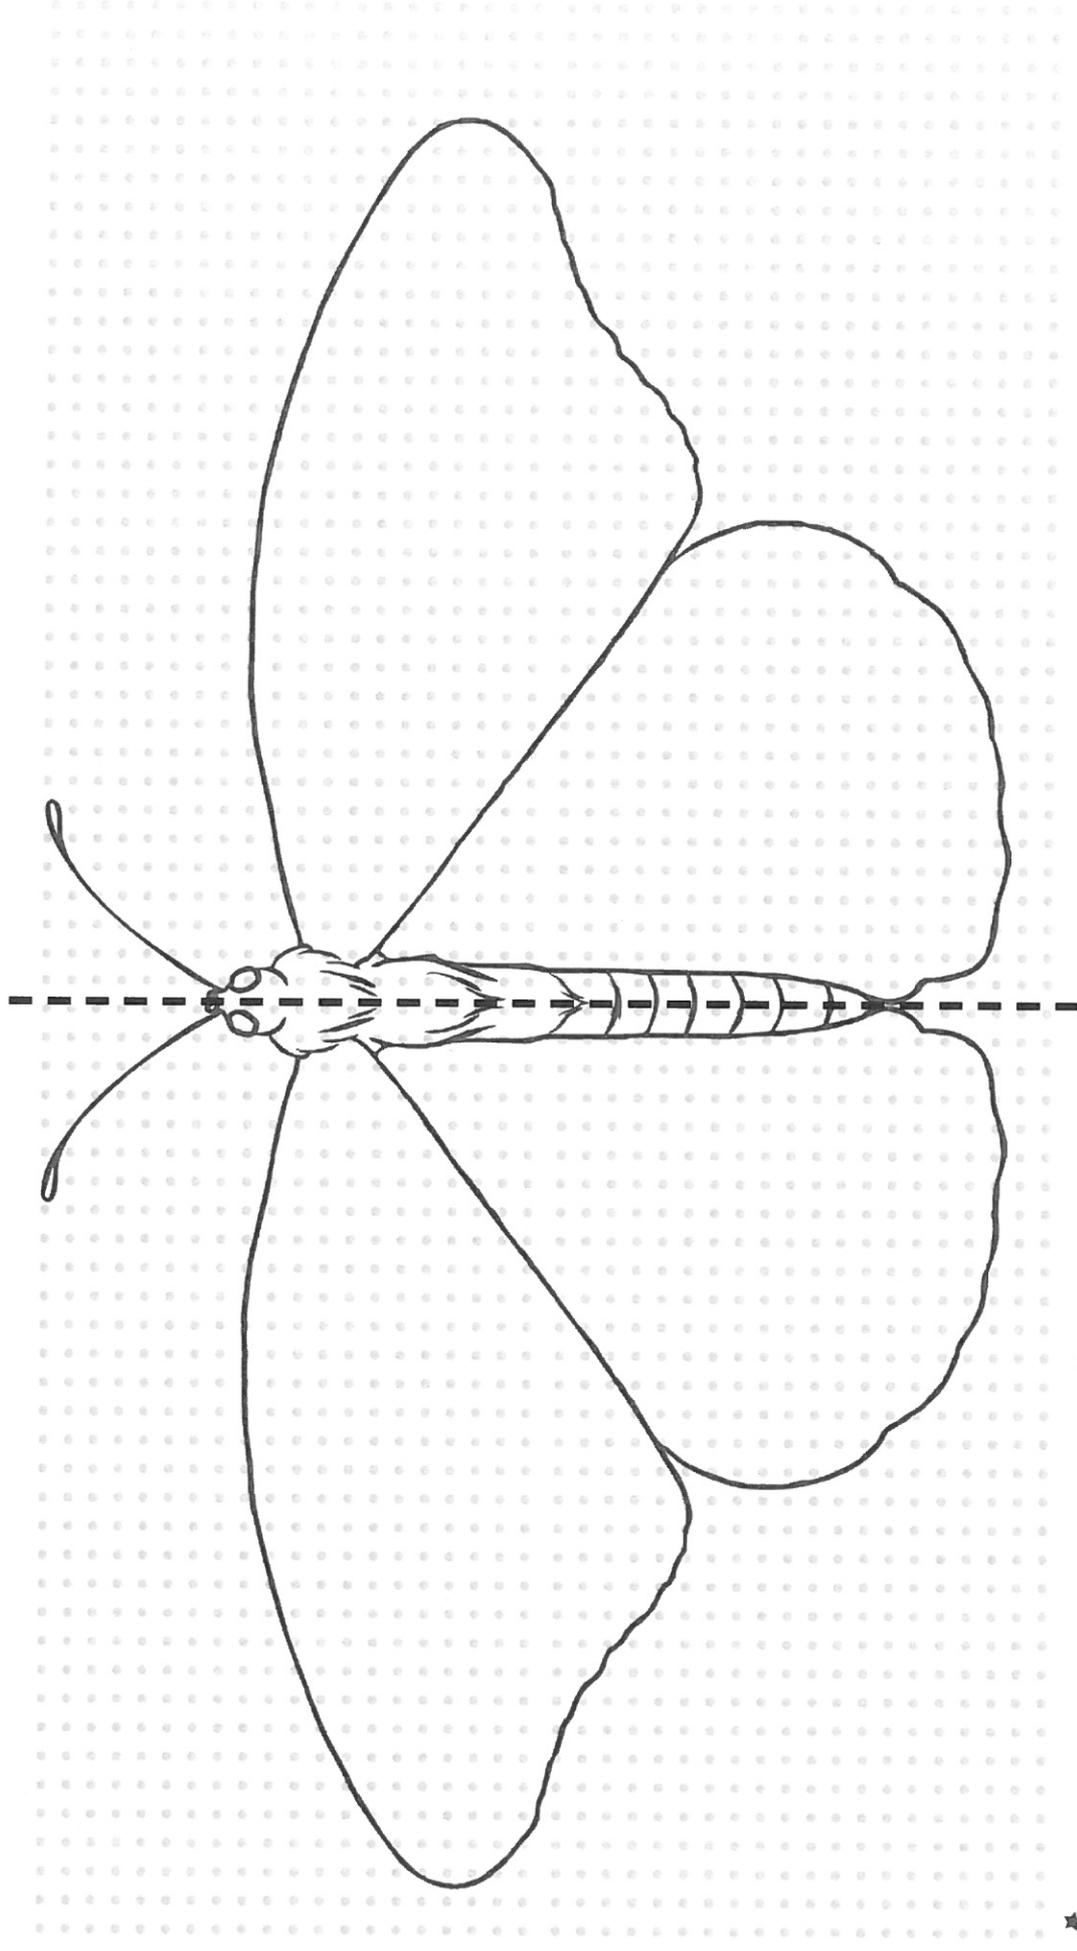

Complete the symmetrical drawings.

Symmetrical Butterflies

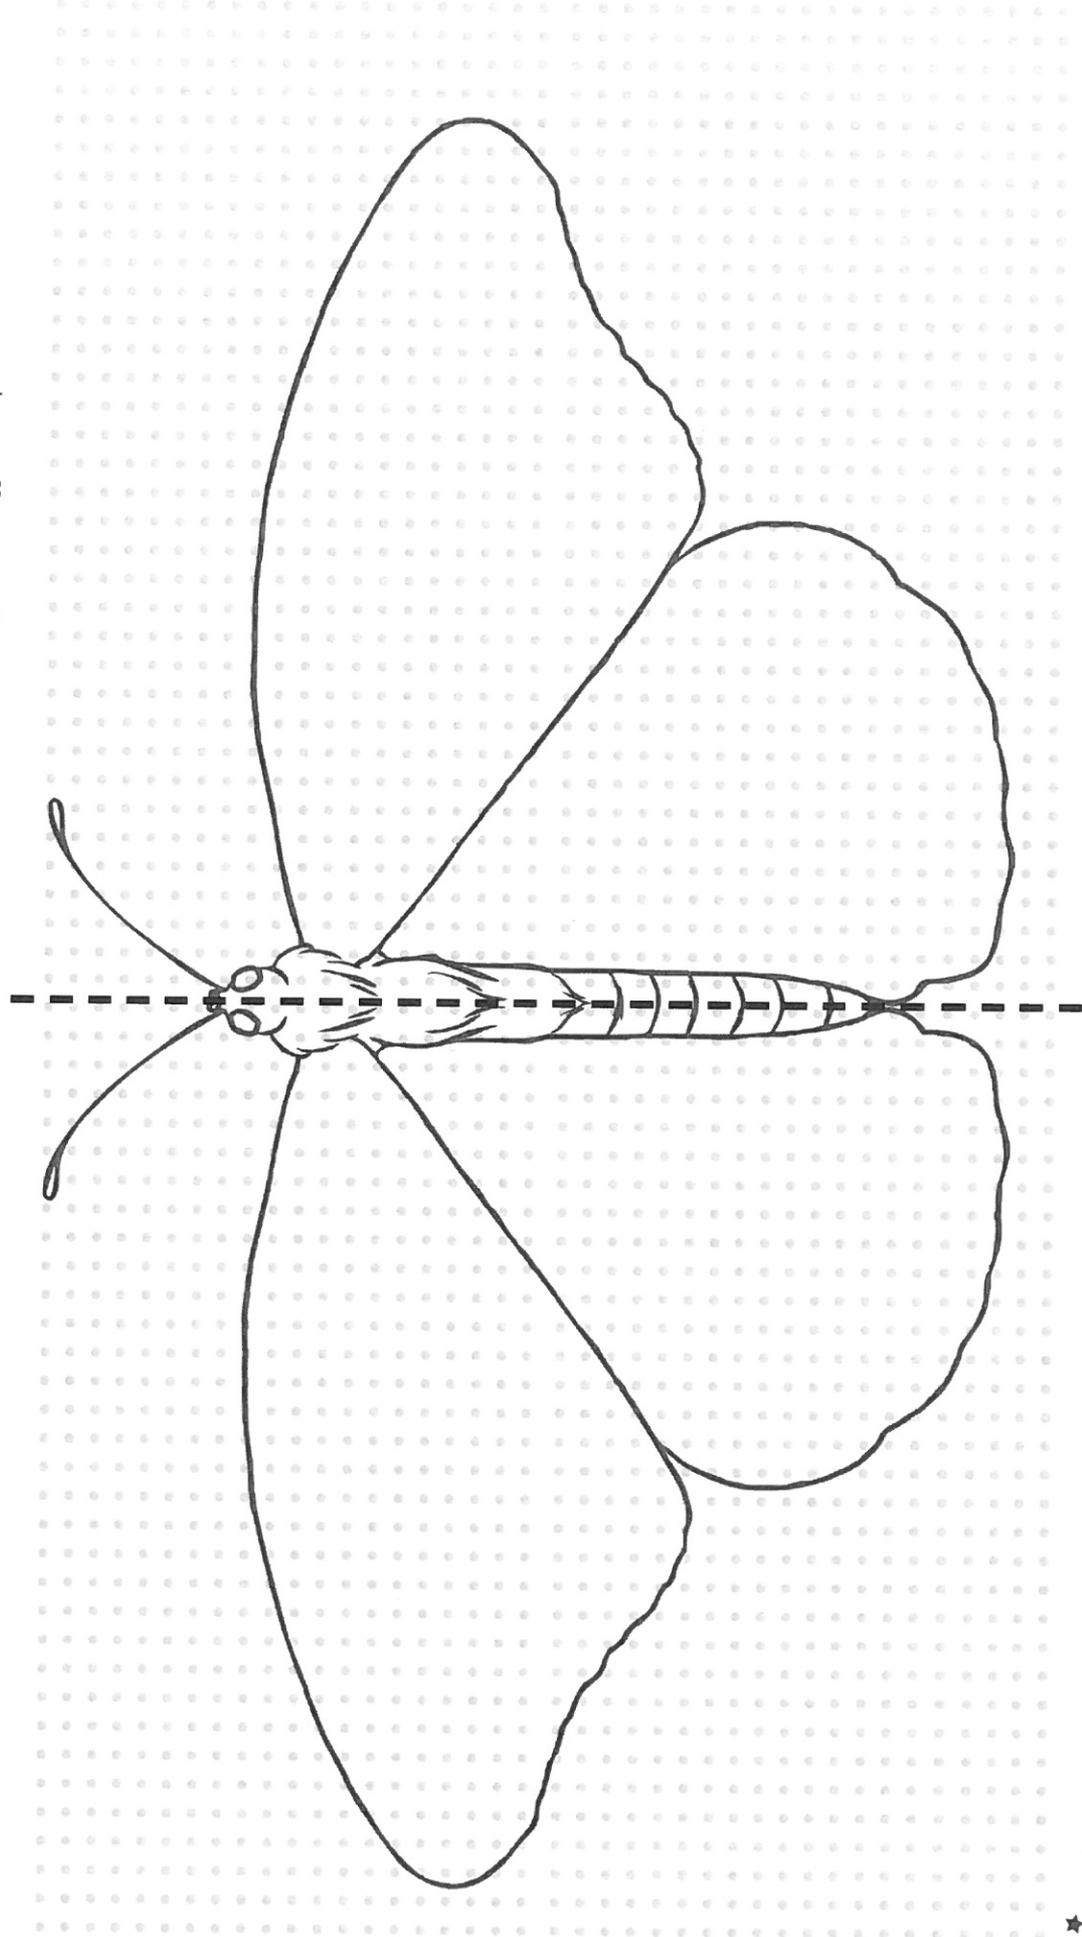

Complete a symmetrical butterfly using 2D shapes.

Symmetrical Butterflies

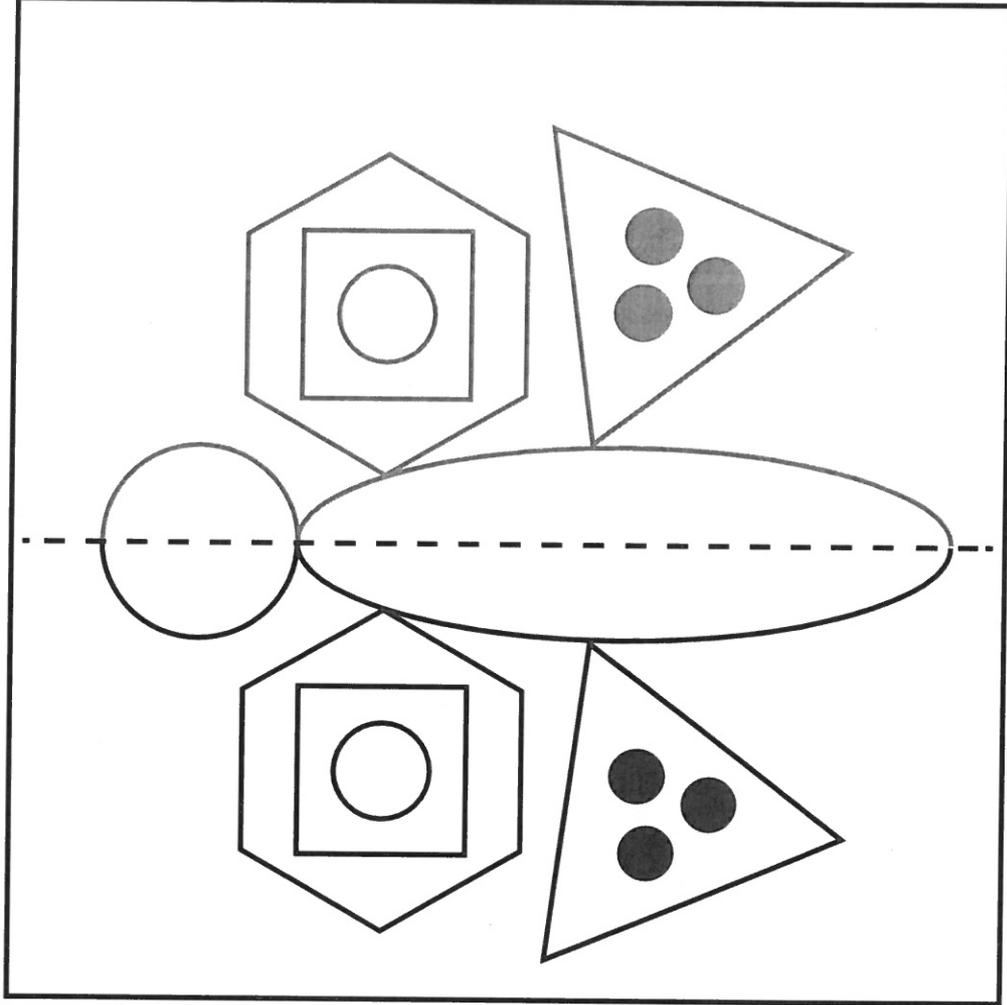

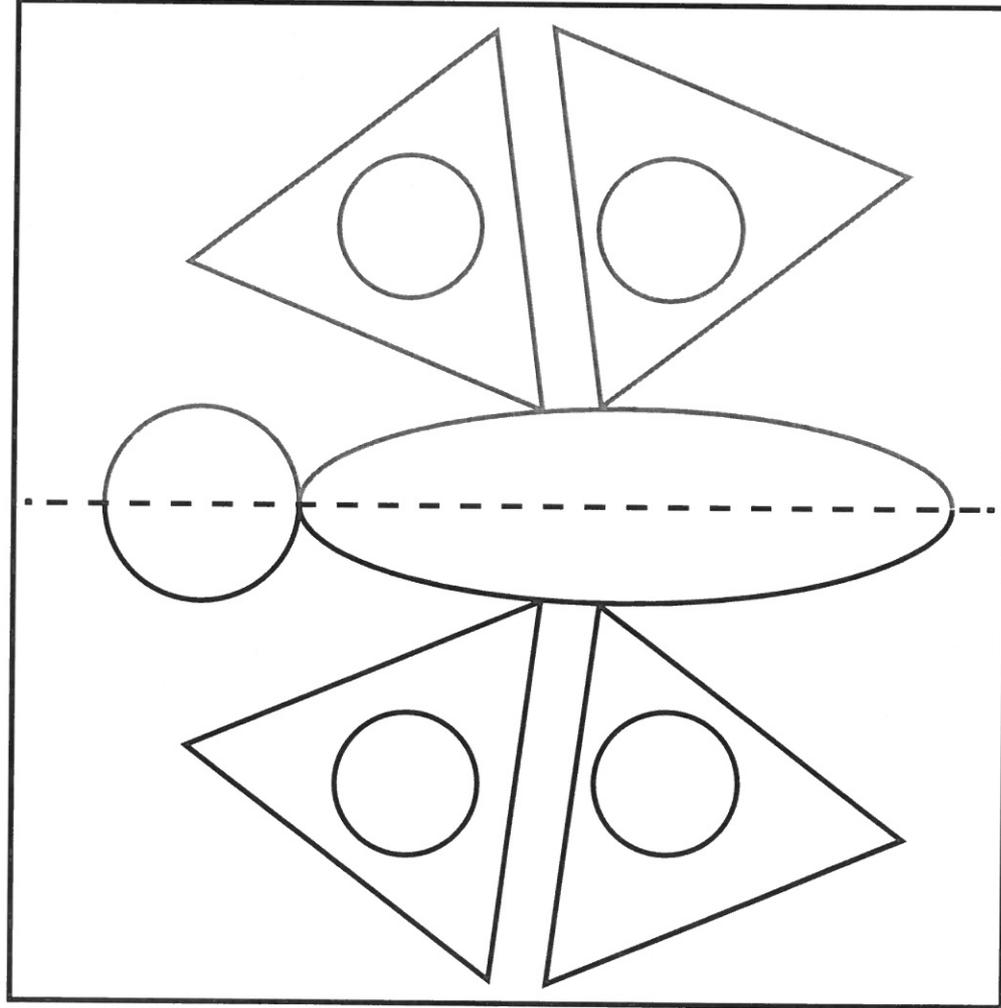

Complete a symmetrical butterfly using 2D shapes including pentagons and hexagons in different positions.

Symmetrical Butterflies Answers

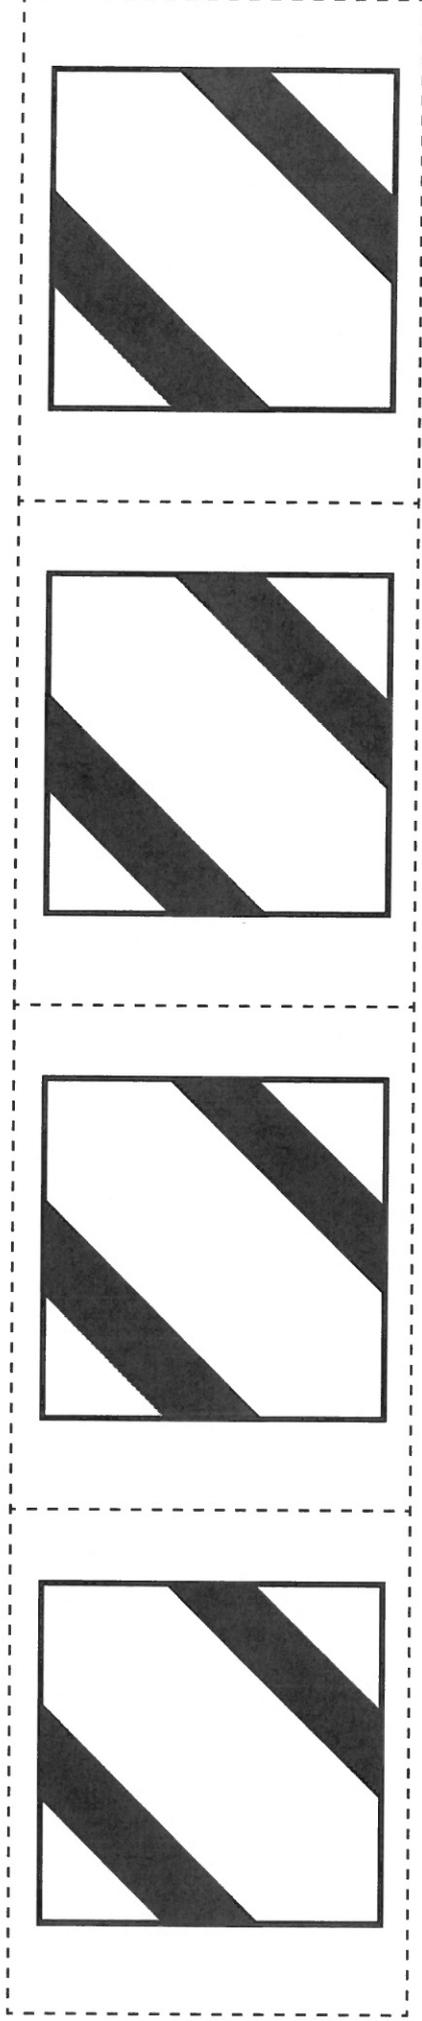

Complete the symmetrical drawings.

Symmetrical Tile Patterns

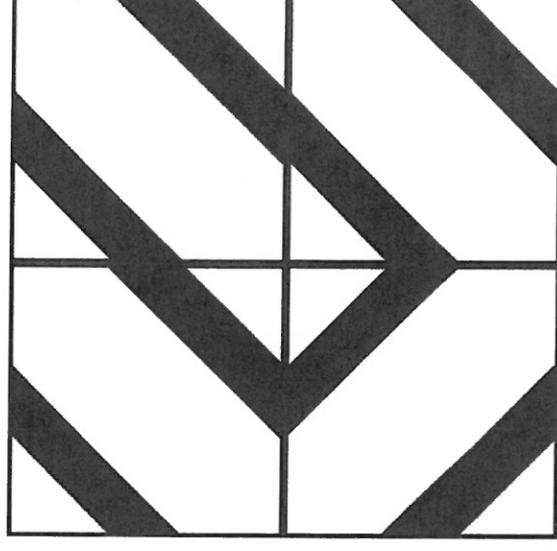

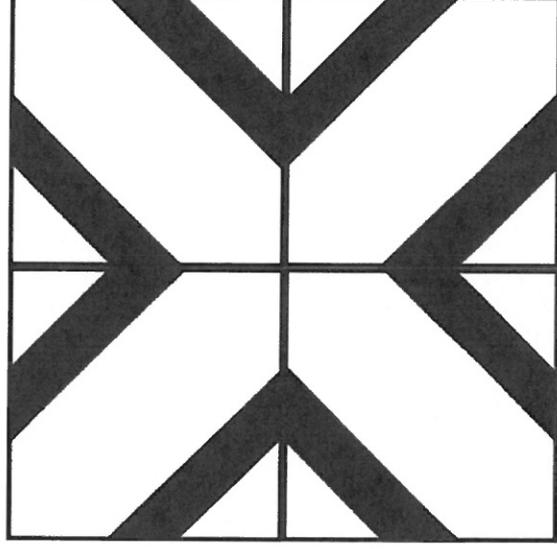

Cut out these four square tiles and make a 2×2 square with them.

What different patterns can you make?

Which patterns have:

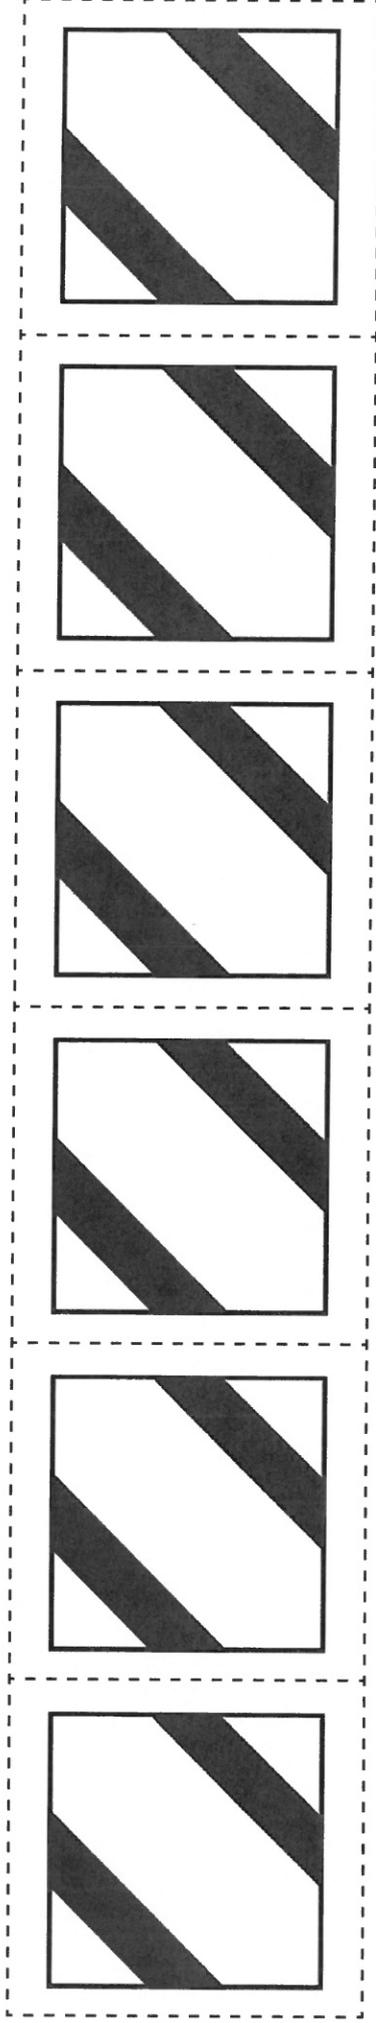

- 0 lines of symmetry?
- 1 line of symmetry?
- 2 lines of symmetry?

Symmetrical Tile Patterns

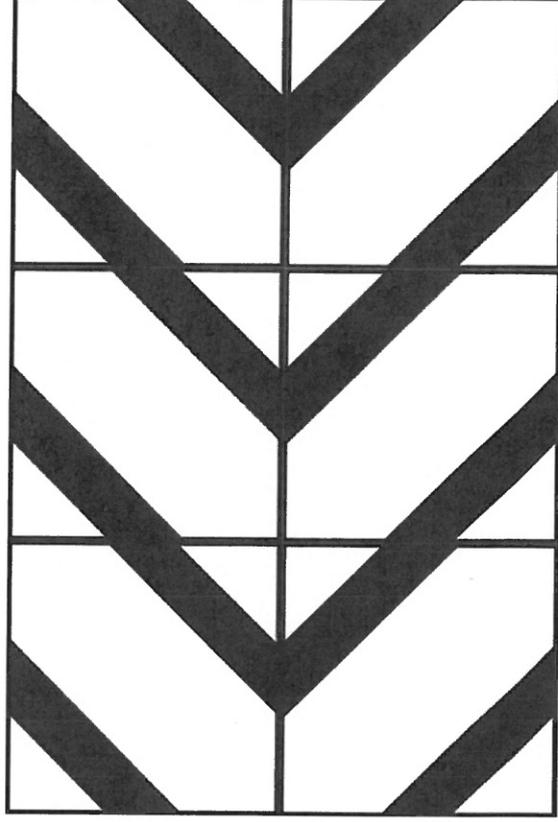

Cut out these four square tiles and make a 3×2 square with them.

What different patterns can you make?

Which patterns have:

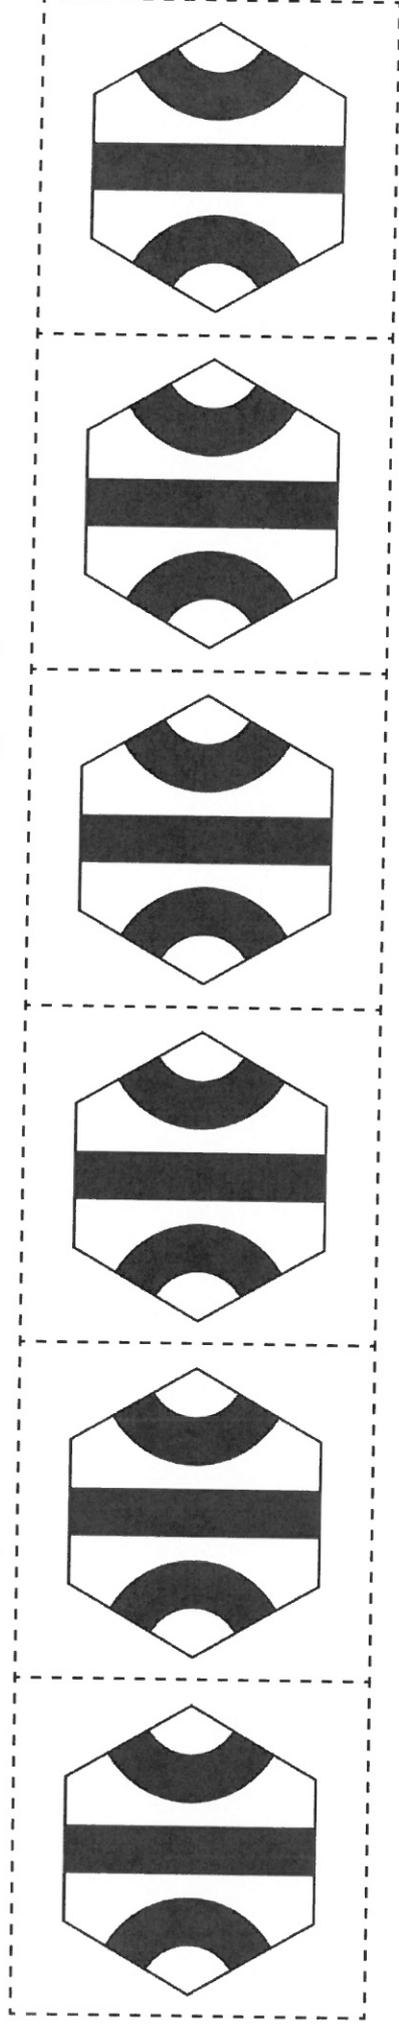

- 0 lines of symmetry?
- 1 line of symmetry?
- 2 lines of symmetry?

Symmetrical Tile Patterns

Cut out these six hexagonal tiles and place them in different patterns.

What different patterns can you make?

Which patterns have:

- 0 lines of symmetry?
- 1 line of symmetry?
- 2 lines of symmetry?
