## Mastery Three Unit Overviews: Spring Term 1

Use opportunities as part of the daily routine to tell the time to the nearest 5 minutes.
At some point in each day, not necessarily the maths lesson, addition and subtraction facts (number bonds) and multiplication and division facts for the 2, 3, 4, 5 and 10 times tables should be rehearsed following guidance provided.

| Spring $\mathbf{1}$ Unit $\mathbf{1 0}$ (Week 1): Place Value, Mental Addition and Subtraction |  |  |
| :--- | :--- | :--- |
| Lesson | Starter | Lesson Focus |
| $\mathbf{1}$ | Count on and back in <br> ones and tens from any <br> two-digit number <br> (crossing the 100 <br> boundary) | Identify the multiples of 100 immediately before and after a <br> given number <br> Round numbers with up to three-digits to the nearest hundred, <br> e.g. 356 rounds to 400 |
| $\mathbf{2}$ | Use a mental partitioning <br> strategy for addition or <br> subtraction of 2 two- <br> digit numbers | Add a number up to three-digits and tens where the tens and <br> hundreds digit changes, e.g. ten more than 397 <br> Add a number up to three-digits and ones where the ones, <br> tens and hundreds digit changes, e.g. one more than 499 |
| $\mathbf{3}$ | Multiply 19 by a single <br> digit number | Subtract a number up to three-digits and tens where the tens <br> and hundreds digit changes, e.g. ten less than 407 <br> Subtract a number up to three-digits and ones where the ones, <br> tens and hundreds digit changes, e.g. one less than 500 |
| $\mathbf{4}$ | Recall/derive <br> multiplication facts for <br> the 2, 3, 4, 5 and 10 <br> multiplication tables | Recognise addition calculations that require mental <br> compensation e.g. $129+49$ and use this strategy where <br> appropriate |
| $\mathbf{5}$ | Identifying the bond to <br> the next multiple of 100, <br> e.g. $231+\square=300$ | Recognise subtraction calculations that require mental <br> compensation e.g. 175 - 39 and use this strategy where <br> appropriate |

| Spring 1 Unit 11 (Weeks 2 \& 3): Counting Sequences, Multiplication and Statistics |  |  |
| :---: | :---: | :---: |
| Lesson | Starter | Lesson Focus |
| 1 | Derive doubles of multiples of 50 to 500, e.g. double 150 | Use partitioning to derive doubles of all numbers to 100. |
| 2 | Recall addition and subtraction facts for 100 (multiples of 5 and 10) | Use arrays to understand the multiplication and division facts for the 8 multiplication table <br> Derive the 8 multiplication table from the 4 multiplication table |
| 3 | Count on and back in tens and hundreds | Use Venn and Carroll diagrams to compare and sort numbers |
| 4 | Partition a three-digit number using base 10 apparatus into two groups in different ways where one group is a multiple of 10 e.g. $165=$ $150+15$ | Use concrete materials to model the effect of multiplying a two-digit number by 10 <br> Describe the effect of multiplying a two-digit number by ten |
| 5 | Addition or subtraction of 2 three-digit numbers where no boundaries are | Multiply a multiple of 10 by a one-digit number, e.g. $60 \times 4$ |

Mastery Three

|  | crossed, e.g. $265+324$ |  |
| :--- | :--- | :--- |
| $\mathbf{6}$ | Use a multiplication trio <br> to identify related facts, <br> e.g. $6 \times 4=24$ so $6 \times 40$ <br> $=240$ | Use partitioning to calculate a two-digit number multiplied by <br> a single digit number using grid method |
| $\mathbf{7}$ | Multiply 19 by a single <br> digit number | Use partitioning to calculate a two-digit number multiplied by <br> a single digit number using grid method <br> Within known tables, use partitioning to multiply T1 by a one- <br> digit number |
| $\mathbf{8}$ | Use multiplication trios <br> to identify missing <br> numbers in multiplication <br> and division number <br> sentences, e.g. $7 \times \square$ <br> =28 | Solve correspondence problems in which n objects are <br> connected to m objects. (finding all possibilities) |
| $\mathbf{9}$ | Round numbers with up <br> to three digits to the <br> nearest 100 | Solve positive integer scaling problems |
| $\mathbf{1 0}$ | Tell and write the time <br> on an analogue clock to <br> the nearest minute - past <br> and to | Read different scales to the nearest whole unit |

| Spring $\mathbf{1}$ Unit $\mathbf{1 2}$ (Week 4): Fractions |  |  |
| :--- | :--- | :--- |
| Lesson | Starter | Lesson Focus |
| $\mathbf{1}$ | Using known <br> multiplication facts (1, 2, <br> 5 and 10 multiplication <br> tables) to calculate <br> unknown multiplication <br> facts from the 8 <br> multiplication table | Recognise fractions of a shape, set of objects or quantity |
| $\mathbf{2}$ | Compare and order <br> numbers with up to three <br> digits | Recognise and use fractions as numbers (placing fractions onto <br> number lines) |
| $\mathbf{3}$ | Recall pairs of multiples <br> of 100 that make 1000 | Use concrete materials to find unit fractions (with <br> denominators of ten or less) of a set of objects, <br> e.g. $\frac{1}{7}$ of 63 <br> Use concrete materials to find non-unit fractions (with <br> denominators of ten or less) of a set of objects, <br> e.g. $\frac{2}{7}$ of 63 |
| $\mathbf{4}$ | Derive addition and <br> subtraction facts for 100 <br> using number lines | Use pictorial representations, e.g. bar model, to find unit <br> fractions of a set of objects, e.g. $\frac{1}{3}$ of 51 <br> Use pictorial representations, e.g. bar model, to find non-unit <br> fractions of a set of objects, e.g. $\frac{2}{3}$ of 51 |
| $\mathbf{5}$ | Round numbers with up <br> to three digits to the <br> nearest 10 and 100 | Show practically or pictorially that a fraction is one whole <br> number divided by another |

## Mastery Three

| Spring $\mathbf{1}$ Unit $\mathbf{1 3}$ (Week 5): Division |  |  |
| :--- | :--- | :--- |
| Lesson | Starter | Lesson Focus |
| $\mathbf{1}$ | Partition a three-digit <br> number (represented <br> using base 10 apparatus) <br> into hundreds, tens and <br> ones in different ways, <br> e.g. 643 is 5 hundreds <br> (500), 14 tens (140) and 3 <br> ones (3) | Use partitioning to derive and use halves of multiples of 10 <br> where the tens digit is odd <br> Use partitioning to derive and use halves of all numbers to 100 <br> $\mathbf{2}$ |
| Recall and use <br> multiplication and <br> division facts for the 8 <br> times table | Use a horizontal number line to show division as repeated <br> subtraction including numbers beyond the multiplication facts <br> that they know |  |
| $\mathbf{3}$ | Use a mental counting <br> on strategy to calculate a <br> small difference, e.g. 102 <br> - 95 = | Use a vertical number line to show division as repeated <br> subtraction for numbers beyond the multiplication facts that <br> they know using greater multiples of the divisor |
| $\mathbf{4}$ | Add 3 two-digit multiples <br> of 10 | Use a vertical number line to show division as repeated <br> subtraction for numbers beyond the multiplication facts that <br> they know using greater multiples of the divisor (including |
| remainders) |  |  |

| Spring $\mathbf{1}$ Unit $\mathbf{1 4}$ (Week 6): Volume, Capacity and Mass |  |  |  |
| :--- | :--- | :--- | :---: |
| Lesson | Starter | Lesson Focus |  |
| $\mathbf{1}$ | Read different scales to <br> the nearest whole unit | Estimate, measure and compare the capacity of different <br> objects <br> Find the difference between the capacities of containers |  |
| $\mathbf{2}$ | Double a two-digit <br> number where the total <br> is more than 100 | Measure and add the volume of different containers |  |
| $\mathbf{3}$ | Use a mental partitioning <br> strategy for addition or <br> subtraction of 2 two- <br> digit numbers | Estimate, measure and compare the mass of different objects <br> Find the difference between the masses of objects |  |
| $\mathbf{4}$ | Tell and write the time <br> on an analogue clock to <br> the nearest minute - past <br> and to | Measure and add the mass of different objects |  |
| $\mathbf{5}$ |  |  |  |
